SCHOLARSHIPS, RESEARCH, AND INNOVATION – FUNDED HERE

*The Next-Gen Tokenized Funding
Platform*

Launch, Trade, and Fund Your Goal
On-Chain

Problem Statement

01

Sulitnya mengakses pendanaan khususnya beasiswa, penelitian dan lain lain tanpa birokrasi

02

Kurangnya funding berbasis komunitas & market token

03

Tidak ada insentif bagi creator setelah launching

Solution

Fund dot Fun
menggabungkan funding
& token market.

Deployer mendapatkan
fee transaksi dari token
yang dibuat selama
Bonding curve

Semua proses fully on-
chain, transparan, dan
trustless.

Market Opportunity

Industri crowdfunding crypto berkembang pesat.

Potensi token-based funding bertema edukasi di Educhain dan open campus ecosystem

How It Works

- Connect Wallet (Metamask, WalletConnect, Coinbase).
- Create Funding Token dengan form.
- Deployer bisa membeli token di awal (opsional)
- Deployer mendapat Fund alokasi 2% supply (vesting by target market cap).
- Token bisa diperdagangkan di Funding Market.
- Saat bonding curve \$50K tercapai, deployer mendapat 30% dari total fee perolehan trading dari sc funding tersebut

Business Model

- 1.5% fee dari transaksi jual-beli.
- Liquidity management fee \$1000 saat LP disetor.

Competitive Analysis

- Fund dot Fun vs Pump.fun vs Juicebox money vs gofund me vs kickstarter
- Fund dot Fun memiliki fee sharing untuk deployer.
- Fund dot Fun memiliki alokasi Funding dari total supply
- Fully on-chain dan memiliki bonding curve.
- Lebih transparan dibanding platform lain.

Roadmap

- Phase 1 (POC – Hackaton): Smart contract, frontend, testing.
- Phase 2 (MVP – Update): Smart contract, frontend, testing, enhance future
- Phase 3 (update): Mobile app
